

LUNGU ILIE-DANIEL

Software-Engineer

ABOUT ME

Passionate Software Engineer with a strong focus on web and desktop application development, primarily using Java and Python. Experienced in building scalable back-end systems with frameworks like Spring Boot, and developing robust desktop solutions. Also oriented toward cloud technologies and AI, with a growing interest in designing modern, intelligent, and distributed systems. Currently contributing to software innovation at OpenText, with a focus on practical problem-solving and continuous improvement. Outside of work, I enjoy football, traveling, and exploring the world of coffee, always interested in how technology can be used to create meaningful and efficient solutions.

EXPERIENCE

Software Engineer

opentext

01.09.2025 - present

- IT automation with OpenText OO, workflow orchestration and process integration.
- Helped developing new features, solving bugs, and security audit
- Contributed to the development of an MCP server.

SC REEA SRL

2021 - 2025

- Developed backend features for airline industry projects using Java as the core language.
- Utilized Spring Boot for microservices architecture, Jenkins for CI/CD, and AWS for deploying scalable cloud solutions.
- Collaborated cross-functionally using JIRA for agile project management.
- Strengthened interpersonal and teamwork skills through regular team-based development cycles.

TECHNICAL SKILLS

- Languages: Java, Javascript, Python, C/C++
- Frameworks & Libraries: Spring Boot, ReactJS, Flask, JUnit, Hibernate
- Operating Systems: Ubuntu/Linux, MacOS
- Databases: MySQL, MongoDB, PostgreSQL
- Concepts: OOP Principles, Architectures, Design Patterns, Algorithms, Agile & Scrum, Microservices
- DevOps: CI/CD Pipelines, AWS features, AWS Lambdas
- Tools: Jenkins, RabbitMQ, Postman, Docker, Git, Maven, AI Tools

ADDITIONAL INFORMATION

- Remote work: Open to hybrid or remote arrangements.
- On-call availability: Available for on-call duties, including outside regular business hours.
